A game you can hold.

X1 Carbon / 0.4 mm nozzle / PLA / original support-free parts

THE FIRST JOB

Open **00_First_Test.3mf**. About **19 minutes / 5 g PLA**.
Check that the pawn stands flat and moves easily through the passage.

LOAD YOUR AMS

1 WHITE / IVORY	2 BLUE	3 GREEN / TEAL	4 GOLD / YELLOW
Board + clock	Explorer 1	Explorer 2	Keys + castle

After the board and clock finish, replace slot 1 with **red** for the dragon marker. Match each job to its intended AMS slot in the print dialog.

FAST PRINT ORDER

00	First test	White / ivory	19 min	5 g
01	Maze board - 216 x 216 x 11 mm	White / ivory	3 h 36 min	163 g
02	Dragon clock - 214 x 30 x 3 mm	White / ivory	41 min	19 g
Fast 03	Explorer 1	Blue	15 min	1.5 g
Fast 04	Explorer 2	Green / teal	16 min	1.5 g
Fast 05	Both keys + castle	Gold / yellow	11 min	2.2 g
Fast 06	Dragon marker	Red	9 min	0.7 g

About 5 h 27 min / 192 g total, including the test. Estimates come from Bambu Studio 2.7.1, with preparation time included. Actual time depends on your material and calibration.

PROJECT SETTINGS

0.20 mm layers / 3 walls / 15% gyroid infill / supports off / no brim.
Projects use Bambu PLA Basic and Textured PEI. Select your actual filament and plate before slicing; keep the supplied flat orientation and 100% scale.

Optional: 03_Game_Pieces_AMS prints all six pieces together in blue, green, gold, and red. It takes about 4 h 36 min / 63 g because of 144 color changes. Use it **instead of** the four Fast jobs.

PLAY TOGETHER

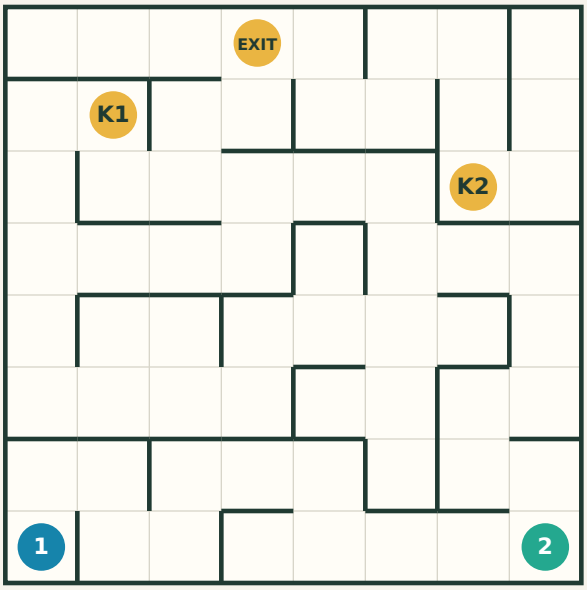
Two keys. One way out.

A cooperative game for two explorers. Bring one ordinary six-sided die.

Your mission: collect both keys and get both explorers through the castle exit before the dragon reaches **12**. You win and lose together.

SET UP

1. Blue explorer on **1**; green explorer on **2**.
2. Put keys on **K1** and **K2**. Put the castle badge on **EXIT**.
3. Put the dragon on **0 for Easy**, **2 for Family**, or **3 for Hard**. It always wakes on **12**.



EASY: 12 ROUNDS
FAMILY: 10 / HARD: 9

EACH ROUND

1. Roll once for the team.
2. Move both explorers. Each gets up to the full number rolled. If you roll 4, each may move up to 4 spaces. Choose who moves first.
3. Collect keys as you reach them. Either explorer may collect either key. Both keys belong to the team.
4. Advance the dragon one space after both explorers have moved, unless you have already won.

MOVEMENT

One step goes to the next square through an open passage. Move up, down, left, or right.

You may turn, stop early, or wait. Unused steps disappear. Explorers can pass or share a space; lift one briefly if needed.

UNLOCK AND ESCAPE

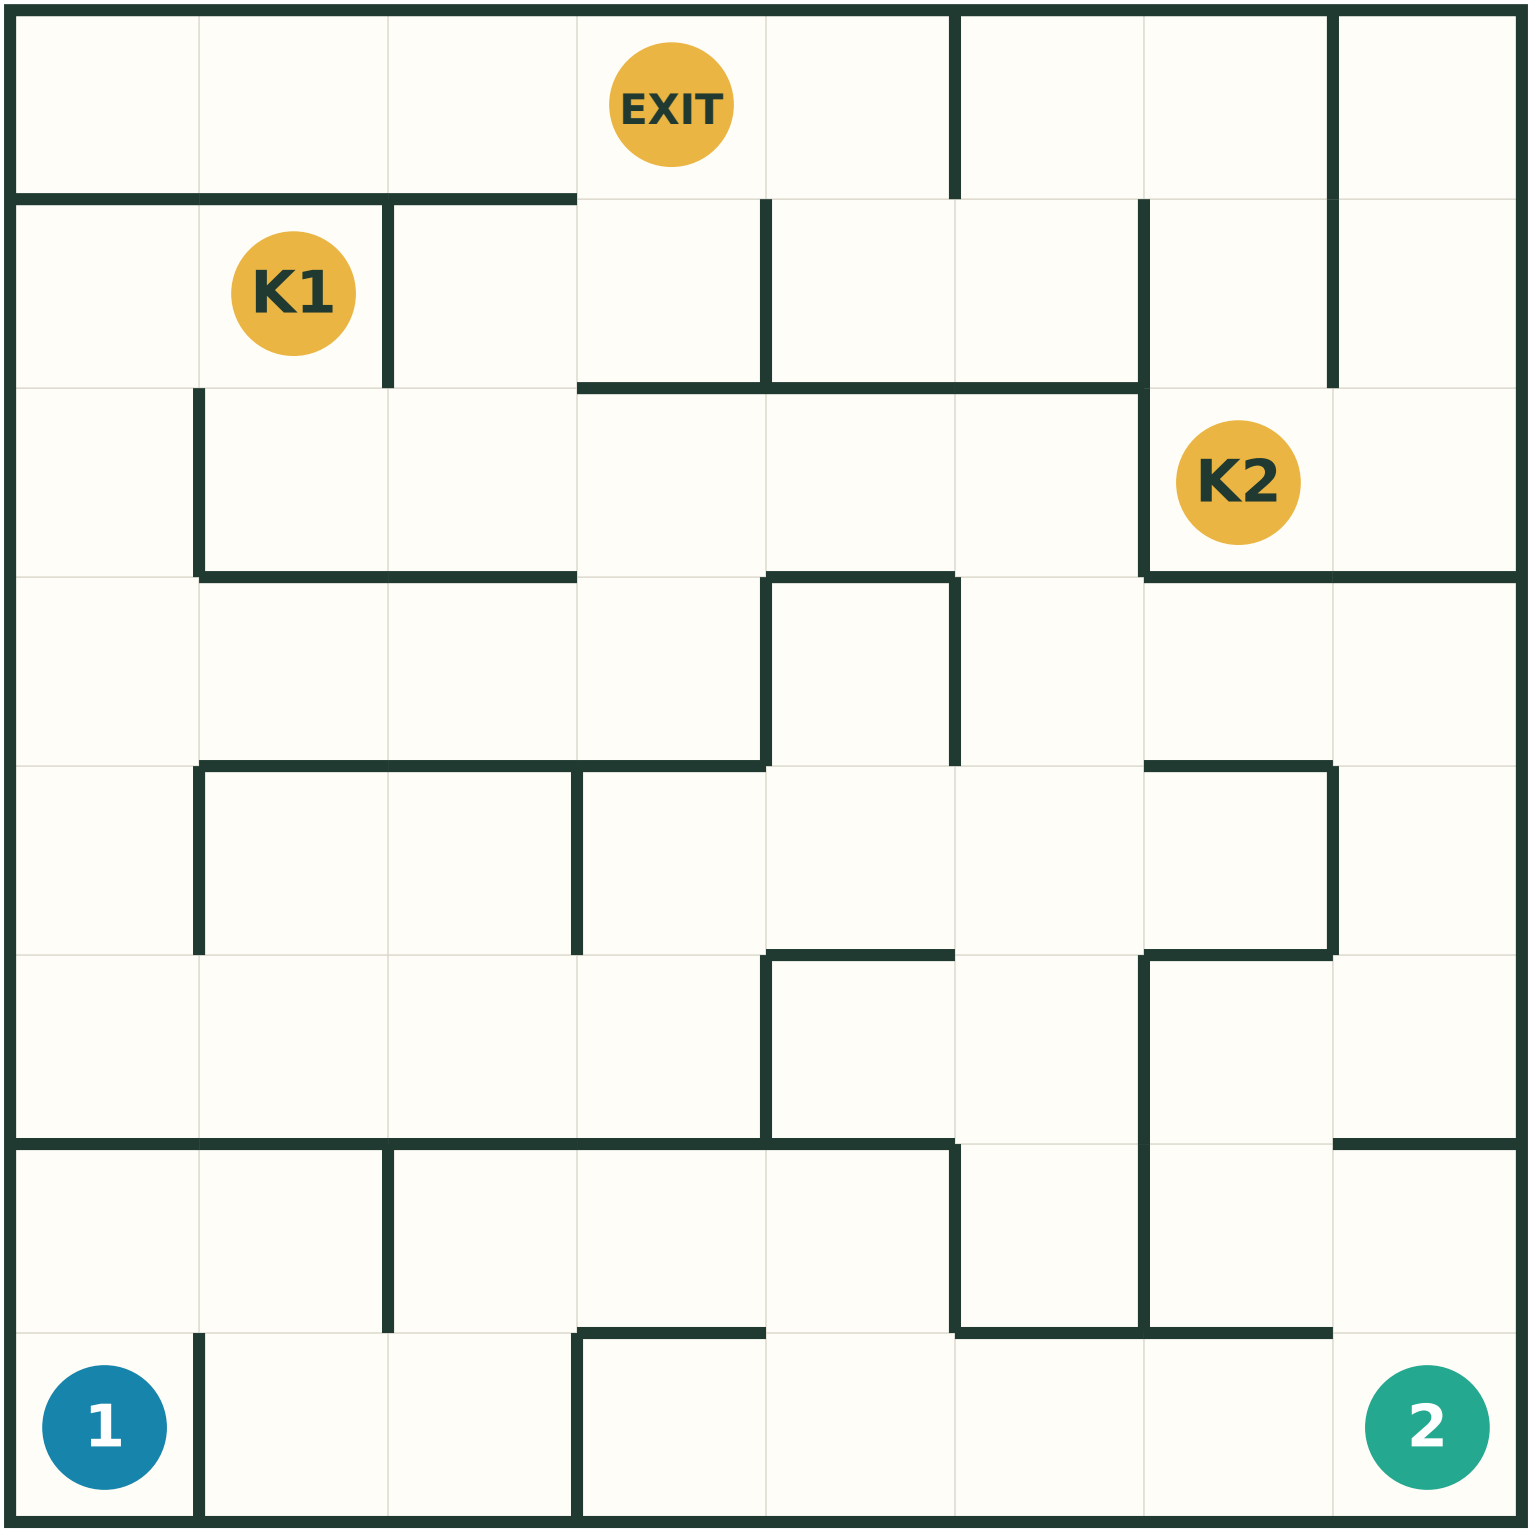
Both keys collected? Move the castle badge aside: the exit is open.

An explorer on EXIT escapes immediately; put that pawn beside the board. Both explorers out means you win - even during the last round.

If the dragon reaches 12 first, reset and try again together.

MOCPOK / DRAGON KEYS

Paper backup board. Print at **100% / Actual Size** for 25 mm cells.
Use the same pawns, keys, die, and rules. A colored circle marks the exit.



DRAGON CLOCK: START 0 EASY / 2 FAMILY / 3 HARD. WAKE AT 12.

0	1	2	3	4	5	6	7	8	9	10	11	12

Original MocPok prototype / The 3D maze uses this same layout.
